 Organisation Mondiale de la Propriété Intellectuelle

The patent offices stand

Exhibitors and visitors will be able to learn about patents, intellectual property and the services proposed by the national offices of 11 countries, present at the Exhibition.

Inauguration of the Exhibition

From left to right: Mr. Pierre Maudet, Mayor of the City of Geneva, Mr. Pierre Losio, President of the Grand Council of the Republic and Canton of Geneva, Mrs. Isabel Rochat, State Counsellor of the Republic and Canton of Geneva, Mr. Francis Gurry, Director General of the World Intellectual Property Organization (WIPO).

The world's unique annual Exhibition

- 1'000 new inventions and products
- 789 exhibitors from 46 countries
- 85% companies and universities
- 15% private inventors and researchers
- 60'000 visitors from all 5 continents
- 650 journalists

The International Exhibition of Inventions of Geneva benefits from the most extensive support and privileges that can be granted to an exhibition. It is under the patronage of the Swiss Federal Government, the State, the City of Geneva and of the World Intellectual Property Organization - WIPO. This support testifies to the usefulness and quality of the event, now acknowledged as the most important exhibition of inventions anywhere today. It is also the most international, with the participation of more than 45 countries.

You should exhibit to:

Show your invention, new product or new technique, your capabilities, your activities and your services to businessmen visiting.

Turn your investments into profit by protecting and developing your invention through the negotiation of licences.

Meet and make fruitful contacts with manufacturers, commercial agents, promoters, financiers, users and entrepreneurs of all kinds, both national and international, who come specially to this Exhibition from many countries.

Publicize the fruits of your research to professional business visitors, journalists and the public at large in order to hasten their acceptance on the marketplace. Grasp every opportunity that the biggest specialist event devoted entirely to inventions can offer.

Benefit directly from the spin-off of the substantial publicity budget which we have earmarked for:

- sending more than 50 000 personal invitations to business visitors all over the world
- inviting international journalists from the press and electronic media and sending them several press releases
- organizing a press conference, held at the headquarters of the World Intellectual Property Organization (WIPO) in Geneva, which will be attended by representatives of the news agencies of the countries represented in the various international organizations
- a poster, advertising and public relations campaign.

Who can exhibit ?

Manufacturing and commercial companies and enterprises - inventors and private researchers - consultancies - laboratories - universities - private and state-owned research institutes and other organizations - patent brokers and promoters of innovation. Associations and similar bodies - service and financial organizations - publishers - regional, national and international organizations may also appear as exhibitors to present their activities, services and programs.

More than 700 exhibitors, personalities and journalists participate in the prize-giving ceremony.

Presenting your inventions or services

You have developed an invention that is worth selling. So you try to market your novelty. To do this, you have to contact manufacturers, commercial agents, financial backers or promoters who can distribute your product worldwide.

By experience we know that to do this yourself will take you a long time and will cost you a lot of money without any guarantee of success.

It could also be the case that your invention is already being manufactured and sold, but not in all countries where you would like to negotiate manufacturing licences or seek new business outlets.

It is to eliminate precisely these difficulties and to enable you to get in direct contact with thousands of professional buyers from all over the world that we have organized the International Exhibition of Inventions of Geneva.

An international exhibition specializing in inventions is the surest way to make you better known and to enable you to market your invention.

How to exhibit?

Your invention may be presented in the form of a **pre-series or commercial sample, prototype, model, plan, drawing, photograph or descriptive text.**

We supply the following:

- a display stand with panels and carpeting (for details, see entry form)
- a sign on the stand giving your name
- a brief technical description of your invention, on a card, in English and French, placed on the stand
- inclusion of your name and the description of your invention in the Official Catalogue of the Exhibition
- the services of the team of interpreter-hostesses to help you communicate with foreign visitors.

Grand Prix

Awarded to the company REHAB ROBOTICS, from Hong Kong, China, for a system for re-education of the hand, which works with just the power of thought.

Prizes and awards

The International Jury made up of 82 specialists will judge each invention exhibited and will select a number of them for prizes and awards. Thanks to the competence and standing of this Jury, we can state with confidence that the prizes given will eloquently certify the merit of the winning inventions and will be a substantial help in their commercial launching.

Geneva the hub of the world

Geneva is unique: a business and finance center, an international marketplace for goods, inventions, ideas and cultures, seat of the United Nations in Europe, of the World Intellectual Property Organization (WIPO), of **250 international organizations and of 569 multinationals**, this city is where one half of the world meets the other.

Its constant growth is due to powerful men of action, who command money and businesses. It is an international economic crossroads, a meeting-place for philosophers, scientists, economists and entrepreneurs.

New inventions, services and visitors from all over the world

The International Exhibition of Inventions of Geneva is the biggest event in the world to be exclusively devoted to inventions. All the novelties at this exhibition can only be shown here once.

Industrial and commercial companies, universities, inventors and researchers, associations, private and state organisms and institutes, present their inventions, the results of their research and their new products.

Manufacturers, commercial agents and financiers will find 1000 absolute novelties ready to be marketed in the following fields: Energy - Environmental Protection - Computer Sciences - General Engineering - Industrial Processes - Watch and Clockmaking - Electricity - Electronics - Building, Construction and Civil Engineering - Carpentry - Plumbing - Ventilation - Heating - Safety and Security Equipment - Ironware - Domestic appliances Commercial and Industrial Equipment - Agriculture - Gardening - Textiles - Medicine and Hygiene - Optical Equipment - Teaching Aids - Transportation - Cars - Foodstuffs - Cosmetics - Health - Sports - Leisure - Practical Novelties - Publicity - Packaging - Toys and Games.
